

Homework 2

Submission deadline: April 08, 2019

1. Build three different block ciphers with the following properties

- (a) They are substitution-permutation networks (SPNs) with 16-bit block length.
- (b) They include four rounds.
- (c) The key schedules for all the block ciphers is performed by using a 16-bit linear feedback shift register (LFSR) [2] as shown in Eq. 1 and 2.

Master key: $K_0 = [k_{0,15} \ k_{0,14} \ k_{0,13} \ k_{0,12} \ k_{0,11} \ k_{0,10} \ k_{0,9} \ k_{0,8} \ k_{0,7} \ k_{0,6} \ k_{0,5} \ k_{0,4} \ k_{0,3} \ k_{0,2} \ k_{0,1} \ k_{0,0}]$

i -th round key:

$$k_{i,15} = k_{i-1,0} \oplus k_{i-1,2} \oplus k_{i-1,4} \oplus k_{i-1,5} \quad (1)$$

$$k_{i,j} = k_{i-1,j+1} \quad (2)$$

(a) **Block Cipher 1:**

SBox:	z	0	1	2	3	4	5	6	7	8	9	A	B	C	D	E	F
	$\pi_S(z)$	1	9	6	D	7	3	5	F	2	C	E	A	4	B	8	0

Permutation:	z	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1	0
	$\pi_P(z)$	15	11	7	3	14	10	6	2	13	9	5	1	12	8	4	0

(b) **Block Cipher 2:** SBox: $\pi_S(z) = \begin{cases} 0 & \text{if } z = 0 \\ z^{-1} \bmod 17 & \text{if } 1 \leq z \leq 15 \end{cases}$,

SBox:	z	0	1	2	3	4	5	6	7	8	9	A	B	C	D	E	F
	$\pi_S(z)$	0	1	9	6	D	7	3	5	F	2	C	E	A	4	B	8

Permutation:	z	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1	0
	$\pi_P(z)$	15	11	7	3	14	10	6	2	13	9	5	1	12	8	4	0

(c) **Block Cipher 3:** SBox: $\pi_S(z) = \begin{cases} 0 & \text{if } z = 0 \\ z^{-1} \bmod 17 & \text{if } 1 \leq z \leq 15 \end{cases}$,

SBox:

z	0	1	2	3	4	5	6	7	8	9	A	B	C	D	E	F
$\pi_S(z)$	0	1	9	6	D	7	3	5	F	2	C	E	A	4	B	8

Permutation:

z	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1	0
$\pi_P(z)$	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1	0

2. Choose a random key. Produce some random or chosen plaintext, ciphertext pairs for all the three different block ciphers.
3. Hikmet Seha Öztürk, Mustafa Koray Akçocuk, Onur Aydınoglu, Mert Külte, Sinan Sezgin, Erfan Gholizadehazari, Atakan Bebek, Selim Sirac Güler, Alper Girgin, Ali Özkahraman will apply linear cryptanalysis [5, 1, 3] to above block ciphers.
4. Muhammet Şamil İkizoğlu, Özlem Altınay, Serkan Gazioğlu, Mustafa Oğuz Dönmez, Furkan Artunç, Burak Memiş, Çağatay Demirel, Yasin Öztürk, Gözde Filiz, Can Özbaş, Nadide Merlin Cecliya Dilara Aylin Opel will apply differential cryptanalysis [4, 3] to above block ciphers.
5. Compare and discuss the results for all the block ciphers.
